

I support XM and ask you to allow it to keep broadcast traffic and weather information. This is a fee based service so I do not see any reason for it not to be allowed. If the distribute a service that I do not want it is the people who pay for the services' decision to take action. There is no reason for the NAB to tell us and XM what we are allowed to hear on the stations our money is going for. I URGE you to reject the NAB's petition 04-160. XM not only offers better variety than standard radio but the quality is great so why make us stick to the poor stations broadcasting on AM and FM to get our weather and traffic? Its like telling companies online that they are not allowed to distribute the news while there are tv stations. It doesnt make any sense. I belive the FCC and NAB should help support XM and other services because satillite is the newest technology so why not work together to make it better instead of fighting over what is and is not allowed. Thanks you for your time and keep XM Instant Traffic and Weather alive!
